

## DRISCOPLEX® 4000/4100 Factory Mutual Series Pipe

## DRISCOPLEX® 4000/4100 FM SERIES PIPE

DRISCOPLEX® HDPE Pipe and Fittings are available to meet your needs in compliance with ASTM D3035/AWWA C901 or ASTM F714/AWWA C906, NSF 61 and FM 1613 product standards.

Produced from only the highest rated HDPE pipe material, DRISCOPLEX® 4000/4100 FM Series Pipe and Fittings are manufactured from PE4710 resin as listed in PPI-TR4.

## DRISCOPLEX® HDPE Pipe and Fittings Advantages:

- ✓ Durable
- ✓ Leak Tight
- ✓ Excellent Flow
- ✓ Low Surge
- √ Fatigue Free
- ✓ Impact Resistant
- ✓ Trenchless Install
- ✓ Bend Radius
- ✓ Chemical Resistant
- ✓ UV Protection
- ✓ Flexibility
- ✓ Environmental

Available Color Stripes to Identify the Application					
Color	Application				
Red	Factory Mutual, Underground Fire Main				

Standard product is solid black with no stripes

## DRISCOPLEX® 4000/4100 Factory Mutual Series

DriscoPlex® Series Pipe Material Physical Properties						
Property	Standard	Typical Value†				
Material Designation	ASTM F714	PE 4710				
Cell Classification	ASTM D3350	445574C (black)				
Density [4]	ASTM D1505	0.960 g/cc (black)				
Melt Index [4]	ASTM D1238	0.08 g/10 min				
Flexural Modulus [5]	ASTM D790	>120,000 psi				
Tensile Strength [5]	ASTM D638 Type IV	>3500 psi				
SCG (PENT) [7]	ASTM F1473	>500 hours				
HDB at 73°F (23°C) [4]	ASTM D2837	1600 psi				
Color; UV stabilizer [C]	ASTM D3350	Black				
[E]	ASTIVI DSSSU	Color with UV Stabilizer				

This is not a product specification and does not guarantee or establish specific minimum or maximum values or manufacturing tolerance for material or piping products to be supplied. Values obtained from tests of specimens taken from piping product may vary from these typical values.

This product flyer is intended for reference purposes. It should not be used in place of the advice from a licensed Professional Engineer. The listed Pressure Class are based on operating temperature up to 80°F and a 0.5 Design Factor for water application per PPI TR-41 and FM1613. Average inside diameter is calculated using Nominal OD and Minimum Wall plus 6% for use in estimating fluid flow. Actual ID will vary. When designing components to fit the pipe ID, refer to pipe dimensions and tolerances in the applicable pipe manufacturing specification. Elevated temperature use considerations may require additional compensating factors. Additional information available at www.performancepipe.com.
