

## Saskatchewan News Releases

### **Tonka Water Awarded Biological Treatment Plant in Canada**

Tonka Water has received an order for water treatment plant upgrades in Eagles Lake, Saskatchewan for The Canoe Lake Cree Nation. The plant will feature vertical pressure vessels incorporating biological filtration for drinking water.

### **Tonka Water Commissions Unitized Treatment System (UTS™) in Saskatchewan**

A Unitized Treatment System™ (UTS™) was recently commissioned for the Canoe Lake Cree Nation in Saskatchewan. This customized UTS™ was constructed using marine grade aluminum and combines parallel plate sedimentation, flocculation and media filtration for complete surface water treatment. This facility also features Tonka Water's highly efficient Simul-Wash™ backwash system, which saves thousands of gallons in backwash waste with every backwash cycle.
